**THE NEW APPROACHES FOR ILL OPERATIONS BETWEEN ACADEMIC
LIBRARIES IN TURKEY**

Ertugrul Cimen, Kadir Has University, Turkey

The early activities about resource sharing started in 1998 in Turkey by the Libraries and Publications General Directorate. There are some legal arrangements for the resource sharing applications but all these arrangements were created for print formats. There is not a general on-line application in national base for ILL at the mean time. In this study, document delivery services and resource sharing activities in Turkey and the KITS (Interlibrary Loan Tracking System) will be discussed. Then, a new model for resource sharing and document delivery services in national base for Turkey will be suggested.
