**SCOPES OF PRACTICE - HEALTH LIBRARIANS IN THE HEALTH
WORKFORCE JIGSAW**

Patrick O'Connor, Toowoomba Clinical Library Service, QLD

The Australian health workforce is undergoing significant change. In response to these changes health librarians need to systematically position their skills and areas of work among a jigsaw of health professions. Drawing on the work of other professions in the health care system the author proposes the creation of a Scope of Practice and Competency Based Standards for entry to and revalidation in the health librarian profession as a mechanism for enabling systematic change.
